U.S. ORIGIN HEALTH CERTIFICATE
FOR EXPORTATION OF BOVINE SEMEN TO THAILAND

A. DONOR BULL

Name: _____ Breed: _____
Registration No. _____ NAAB Code _____ Date of Birth: _____
Owner: _____
A.I. Center: _____ Date Bull Entered AI Center _____

B. CONSIGNOR

Name: _____ Address: _____

C. CONSIGNEE

Name: _____ Address: _____

D. DESCRIPTION OF SEMEN COVERED BY THIS CERTIFICATE

Number of Units	Dates of Collection	Collection Codes
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

E. HEALTH TESTS CONDUCTED

The donor bull was subjected to the following tests or examinations on the dates indicated during the 6 months before the date of collection of the exported semen, with negative results:

1. Bluetongue: Agar gel immunodiffusion (AGID) test _____ OR CF test at 1:5 dilution _____
2. Brucellosis: Complement fixation (CF) test at 1:10 dilution OR standard tube test at 1:50 dilution _____
3. Tuberculosis: Intradermal tuberculin test _____
4. Leptospirosis: Microtiter agglutination - Lysis test for *L. pomona*, *L. hardjo*, *L. canicola*, *L. icterohemorrhagiae*, *L. grippotyphosa* _____
5. Campylobacteriosis: Culture of preputial cavity washings _____

6. Trichomoniasis: Culture of preputial cavity washings _____

7. Enzootic bovine leukosis: AGID test or ELISA test _____

F. CERTIFICATION STATEMENTS

1. The United States has been free of foot-and-mouth disease, rinderpest, contagious bovine pleuropneumonia and lumpy skin disease for a period of more than 1 year before the semen collection.
2. The donor bull named herein from which the semen has been collected has remained in the United States for more than 12 months, has been in the AI center for at least 6 months, and has not been used for natural service during this period.
3. At the time of collection of semen for export to Thailand, the donor bull and all other animals at the AI Center were free from clinical signs of the following diseases: enzootic bovine leukosis, infectious bovine rhinotracheitis, infectious pustular vaginitis (IBR/IPV), bluetongue, Johne's disease, vesicular stomatitis, leptospirosis, brucellosis, tuberculosis, trichomoniasis, campylobacterosis, and bovine viral diarrhea (BVD).
4. The donor bull and all other animals at the AI Center tested negative on semiannual tests to the following diseases: enzootic bovine leukosis, bluetongue, leptospirosis, brucellosis, tuberculosis, trichomoniasis, and campylobacterosis.
5. The semen for export to Thailand was collected and processed under the supervision of a USDA Accredited Veterinarian (or Federal Veterinarian) at facilities where sanitary conditions are secured.
6. The diluent used for processing the semen for export to Thailand is free from pathogenic organisms. Antibiotics have been added to the diluent used for processing the semen for export.

Health Certificate No. _____
(Valid only if the USDA Veterinary
Seal appears over the Certificate No.)
